

Equifax Cybersecurity Information

On September 7, 2017 Equifax Inc., announced a cybersecurity incident potentially impacting approximately 143 million US consumers. Criminals exploited a US website application vulnerability to gain access to certain files. Based on the company's investigation, the unauthorized access occurred from mid-May through July 2017. The company has found no evidence of unauthorized activity on Equifax's core consumer or commercial credit reporting databases.

The information accessed primarily includes names, Social Security numbers, birth dates, addresses and in some instances, driver's license numbers. In addition, credit card numbers for approximately 209,000 US consumers and certain dispute documents with personal identifying information for approximately 182,000 US consumers were accessed.
